NYS Clean Heat Ranking Criteria

Criteria 1
30 Points

What?
Total percent of applications successfully processed vs. total applications submitted over evaluation period.

Why?
Grades follow-through with application submission and overall program success rate.

Criteria 2
40 Points

What?
Points earned are based on the contractor's average QA/QC Post-Inspection Score.**

Why?
Grades post-inspection quality and compliance with best practice installation guidance.

Criteria 3
30 Points

What?
Total percent of applications that entered an "attention required" status, vs. those that did not.

Why?
Grades application submission accuracy. May improve payment times and reduces administrative burden for contractors and the program.

Total Points Earned between 85-100

Total Points Earned between 70-84

**Total Points Earned between 55-69**

*To be eligible for badging, Participating Contractors must submit at least three projects during the review period to the NYS Clean Heat Program.

**Inspections scores are graded on a 1-5 scale. Corrective action made on post-inspection reports will earn back 50% of lost points.

*** Scores and criteria are based on program guidelines at the time of application submission.
